

Evolution Serger Cover

Pattern includes the following techniques, working with wire, flatlock weaving, prairie points, no turn casing and cording. The patchwork section on the back of cover holds the 'Threading Guide', the two side pockets hold flex and foot pedal.

Access to a number of videos to help you with the techniques.

You can also join 'My Sew Along' course on a closed Facebook Group with access to 40 Videos to help you make this cover, \$10 fee.

You will need:- Note: For some fabrics the amount needed is stated in inches and also as part of a yard. That is because you actually only need 16.5 inches but if you are getting fabric cut in a store you will need to order 1/2 a yard (18 inches). If you have fabrics in your stash use the inches guide. My kit fabrics are cut in inches not parts of a yard.

Buttons
I used a 1.5 inch diameter `bling` type button on front panel flower (Hobby Lobby) I have not included it in the kit because I frequently find some of the `diamonds` missing on this item. Therefore, I did not want to be involved with supplying you with a faulty item. I prefer to go to the store and directly check their stock and select my own.
